Summary of Issues During Development and Demo:

1. Linking sign-up and log-in pages, integrating links and referrals between webpages
2. Log-in and sign-up credentials not there yet
3. No integration of a working database with patient info
4. Integrating appointment scheduling form with physical calendar
 - a. Won't transfer Time/Date to the calendar yet

TA Suggestions:

1. Convert client side javascript to server side javascript
2. Work on connecting the front-end to the database
3. Work on implementing NodeJS
 - a. To do this reference past labs and homeworks
